

IN THE CLAIMS

Please amend the claims as follows in accordance with the Revised Format of
Amendments under 37 C.F.R. § 1.121.

1 1. (currently amended) A network addressable device in a communications
2 network for creating and publishing a commercial grade
3 publication from an authored work, comprising:
4 (a) a publisher for converting the authored work to a resulting
5 commercial-grade publication wherein the publisher is linked to at
6 least one remote service provider for remote electronic editing of
7 the authored work for content such that a galley is created from
8 the authored work and for returning the galley to the author for
9 creation of the commercial grade publication from the galley;
10 (b) a repositer linked with the publisher for storing the commercial-
11 grade publication; and
12 (c) a sales manager linked with the repositer for retrieving the
13 commercial-grade publication from the repositer and distributing
14 that commercial-grade publication without modification.

1 2.(original) The network addressable device according to Claim 1 wherein the
2 network addressable device further includes:
3 (a) an encoder linked with the publisher, the repositer, and the sales
4 manager for securing information associated with the authored
5 work from unsolicited disclosure outside the network addressable
6 device.

3.(original) The network addressable device according to Claim 2 wherein the
2 network addressable device is coupled to a browser.

4.(cancelled)

15.(original) The network addressable device according to Claim 1 wherein the
2 publisher interfaces with a remote service provider for preparing the
3 authored work for marketability.

16. (canceled)

17.(original) The network addressable device according to Claim 1 wherein the
2 repositor provides the commercial-grade publication to the sales manager.

18.(original) The network addressable device according to Claim 1 wherein the sales
2 manager distributes the commercial-grade publication in a format
3 compatible with electronic media.

C 19.(original) The network addressable device according to Claim 1 wherein the sales
2 manager accounts for each distribution of the commercial-grade
3 publication for purposes of collecting revenue.

20.(original) The network addressable device according to Claim 1 wherein the
2 network addressable device is linked with the Internet communications
3 network.

21.(original) The network addressable device according to Claim 1 wherein the
2 network addressable device is linked with an intranet communications
3 network.

22.(currently amended) A computer program code on computer readable media for
2 creating and publishing a commercial grade publication from an authored
3 work in a communications network, comprising:
4 (a) a first computer program code for converting the authored work to a
5 resulting commercial-grade publication wherein the first computer
6 program code interfaces with a remote service provider for editing the
7 authored work for content such that a galley is created from the authored

8 work and for returning the galley to the author for cr ation of the
9 commercial grade publication from the galley;
10 (b) a second computer program code linked with the first computer program
11 code for storing the commercial-grade publication; and
12 (c) a third computer program code linked with the second computer program
13 code for retrieving the commercial-grade publication from storage and
14 distributing that commercial-grade publication without modification.

¶13.(original) The computer program code according to Claim 12 wherein the third
2 computer program code accounts for each distribution of the commercial-
3 grade publication for purposes of collecting revenue.

91
¶14.(cancelled)

¶15.(original) The computer program code according to Claim 12 wherein the third
2 computer program code interfaces with a remote service provider for
3 preparing the authored work for marketability.

¶16.(original) The computer program code according to Claim 12 wherein the second
2 computer program code provides the commercial-grade publication to the
3 third computer program code.

¶17.(currently amended) In a communications network environment, a method for
2 creating and publishing a commercial grade publication from an authored
3 work, comprising the steps of:
4 (a) receiving the authored work within the communications network;
5 (b) allocating the authored work to a remote service provider for content
6 editing electronically via the communications network to facilitate
7 converting the authored work to a commercial-grade publication such that
8 a galley is created from the authored work ;
9 (c) returning the galley to the author for creation of the commercial
10 grade publication from the galley

91

¶ 19.(original) The method according to Claim 17 further comprising the step of:
2 (a) distributing the commercial-grade publication.
